

A STEADY PATH FORWARD: NGUYEN THI NHU HIEN

Nguyen Thi Nhu Hien is the eldest daughter in a family of four. Growing up, her parents worked as laborers with an unstable income, while also caring for her elderly grandparents who had no pension. With many responsibilities at home, staying in school was sometimes a challenge.

During those years, Hien received support from **LOVE**, which helped ease part of the cost of her education and daily life. More importantly, she had people who checked in, encouraged her, and walked alongside her in a quiet, consistent way.

Over time, Hien's academic performance improved. She became more confident in her studies and, early on, began to show a strong interest in working with children. What started as a simple interest grew into a clear direction for her future.

After graduating, she began working at FPT Schools, gaining her first professional experience. Today, she is a primary school teacher at Duc Tri Primary School in Da Nang; her early interest has now become a reality.
